Passenger Trains Return to Gettysburg

Photo: Art House

Patriot Rail's Gettysburg and Northern Railroad is readying its excursion passenger service, marketed as "Gettysburg Railway." Locomotive 1863, two of the completely rebuilt passenger cars (originally built in 1949 as Pullman sleepers), and a power car were at the company's former Reading Company station on Washington Street in Gettysburg on July 26, 2025. The depot, which has been expanded to include a merchandise sales room, was first opened in 1884. The depot and cars are, appropriately, decorated in blue and gray. *Art House*
