Rolling Through Langhorne

Richard Adams photo

At 11 a.m. on September 9, 2022, Richard Adams photographed eastbound CSXT train S989 at Langhorne, PA, before it went into Woodbourne Yard on the Fairless Branch. Motive power was CSXT 8006, an EMD SD40-2 built in March 1979 with frame number 786167-7. It was numbered LN 8006 and later renumbered SBD 8006. The locomotive was pulling IDTX (Illinois Department of Transportation) cars 4111, 4112, 4113 and 4115. Richard notes, "Evidently there may be some high-speed testing on the straight-away in Rhode Island. The lettering on the cars is Amtrak Midwest."
