## Last Train From Gore

*Mason Cooper photo*

Following the last revenue run on January 3, 2024, there was one more movement over the line between Winchester and Gore. Mason Cooper writes that although the earlier train “was ‘officially’ the last train, there was one car bad ordered for brake shoes and two cars that were added at the last minute. They moved on January 18th and the track up to the mine was blue flagged. The power going west to Gore was 3815 and 2689. The 3815 was dropped off at the shop and the 3817 worked up to the mine and was on the train back to Winchester.” Read about it in this High Green!
