## The Track Ahead

Last month's High Green featured the last Winchester & Western train to depart the sand quarry in Gore, VA. This month we'll take a trip down the line to see the WW from Winchester to Gore and we'll visit every location with a switch or spur track. The photo above, taken a short distance from the WW's connection with CSX in Winchester, looks west with the main line going through the O'Sullivan Films facility on both sides of the tracks. A covered hopper is visible to the right of the main line. Take a trip down the line in this High Green!
