Starting The Month Off Right

Brunswick [MD] Railroad Days took place during the first weekend of October, offering rides in MARC cars from Brunswick west to Shenandoah Junction and return, with runs at 1 and 3 p.m. In the photo above, a photographer takes a picture of the day's first train as young photographers with tripods capture the scene from the south side of the tracks. The MARC train emerged from the yard shortly after a westbound CSX freight train had passed through on the track next to the station. The excursion train moved past the station and then backed down onto the track by the station to load passengers. In the lead was MARC 25, an MPI MP36PH-3C, followed by MARC 73, an EMD GP39PH-3C. The passenger cars were 7732, 8094, 8009, 8014, 8015, and 8046 (cab car).
